Skills

I am a web developer primarily specializing in JavaScript and TypeScript. I have more experience in frontend development, working with Vanilla JavaScript, TypeScript, and React. Additionally, I have a solid understanding of backend technologies such as Node.js and Python.

- **TypeScript:** I have a strong command of it, using it almost as easily as JavaScript. However, I occasionally encounter some challenges with typing, particularly when working with frameworks.
- **JavaScript:** Advanced level, with the ability to develop interactive and dynamic web applications. I have a year and a half of professional experience, but I have been using it for three years for learning and personal projects.
- **React:** Intermediate level, I learned React with version 17, starting with Hooks. I completed a full course and am now taking a more advanced one.
- **Node:** I started learning Node with version 14, and now we're working with version 20. I am currently reinforcing my skills. I've learned to create REST servers, manage authentication, and I've even used sockets for direct communication.
- **Python:** I completed a 100-day Python course, starting from the basics and working on dozens of

projects. I learned web development primarily with Flask, data scraping with Selenium, and some data analysis with Pandas and visualization with Matplotlib, although I need to strengthen my skills in the last area..

- **MySQL:** Experience in the design and management of relational databases with MySQL.

I have experience with other JavaScript frameworks like Next.js, Angular, Vue, and Qwik. My strong foundation in JavaScript and TypeScript allows me to adapt to these frameworks easily, with React being the one I've worked with the most.

In my most recent job, I worked on both the backend and frontend, enhancing my skills in JavaScript, HTML, PHP, and CSS.

Additionally, I possess significant interpersonal and professional skills, including:

- **English Proficiency:** I have a good command of English, acquired through self-study. My reading and listening comprehension are at an advanced level. I possess solid writing skills, though my speaking ability is not yet optimal due to a lack of practice, but I am actively working on improving it.
- **Adaptability:** I quickly adapt to new technologies and work environments, learning and applying new knowledge effectively.
- **Continuous Learning Management:** I am always learning or practicing something new, taking courses and working on personal projects to improve my skills and stay up-to-date with the latest technologies and trends.

Experience

Semilla Proyectos Internet, Web Developer

03/2023 – 03/2024, Avilés

In my role as a Web Developer at Semilla Proyectos Internet (IA gestión), I actively participated in various projects and tasks, including:

- **Web Development:** I designed and implemented complete websites and made improvements to existing sites. I worked with technologies such as JavaScript, PHP, CSS, HTML, and MySQL.
- **Improvements in Internal Applications:** I contributed to the development of a real estate CRM by enhancing the user experience. I implemented a batch actions feature, significantly optimizing the workflow.
- **Code Optimization:** I promoted the creation of reusable components and improved code efficiency by reducing files with repeated code while maintaining full functionality.
- **Requirements Management:** In recent projects, I attended meetings to define requirements and implemented them directly in the code, ensuring that client expectations were met.

I-Logica, Web Developer

05/2021 – 11/2021, Luanco

During my time working at I-logica, I improved my web development skills, including:

- **Frontend Development:** I used JavaScript and TypeScript to create dynamic web pages, along with CSS and HTML for layout..
- **Practice Projects:** I developed a landing page for a hamburger restaurant, applying web design techniques to enhance the user experience.
- **Active Learning:** I took advantage of this experience to learn coding best practices and

collaborate with the team on minor tasks.

Additional Work Experience

In 2020, I worked as an IT Technician for CGSI with Seresco SL for 6 months, where I developed technical skills related to IT support and problem-solving. Additionally, I was a Data Center Operator at Asac for 3 months, gaining experience in data center management.

Between 2008 and 2018, I worked in the hospitality industry both in the kitchen and as a waiter, which allowed me to develop interpersonal skills, time management, and teamwork in a dynamic and demanding environment.

Education

Advanced Technician in Web Application Development, C.I.F.P Avilés

2018-2021, Avilés

Advanced Technician in Operating Systems and Network Administration, C.I.F.P Avilés

2017-2019, Avilés
